## Phase-out of C5G Gasket Mounted Check Valves

We regularly review our product offerings to ensure the support of our customers and the availability of our products in order to always keep the competitiveness on the market with high quality and performance products.

As a part of this process, we will be phasing out the following:

- C5G-805
- C5G-815
- C5G-825

We offer the following replacements for sizes 815 and 825. Size 805 is being discontinued with no replacement available.

- C5GV-815UG
- C5GV-825UG

The only spring options available will be:

- 5 PSI (0,35 BAR) Standard
- 50 PSI (3,50 BAR) Model Code Suffix S3
- 75 PSI (5,00 BAR) Model Code Suffix S8

The advantage of the C5GV is that the pressure rating is 5000 PSI (350 Bar) whereas the C5G is only 3000 PSI (210 Bar)

### Phase out dates:

Phase out period will be between 1<sup>st</sup> June 2020 and 1<sup>st</sup> September 2020.

Last order date for C5G will be 1<sup>st</sup> June 2020.

### Service Policy:

It is expected that spare parts for the C5G design valves may continue to remain available for some time, however, as parts become limited then future warranty & repair activities will be supported by offering new equivalent valve type units. This activity will be managed on a case-by-case basis, and you should contact your local Service and Repair for specific information.
