Valvistor Cartridge Valve Covers June 2019

We regularly review our product offerings to ensure the support of our customers and the availability of our products in order to keep our competitiveness in the market with high quality and performance products.

As a part of this process, we will be rationalizing the Valvistor range of Cartridge Valve Covers. The HFV1-S2 models will be phased out and only HFV3-B29 will be available.

The difference between S2 and B29 is as follows:

- S2 is inch threads to hold pilot valve and no bolts supplied to hold the main valve.
- B29 is metric threads to hold pilot valve plus main valve holding bolts supplied.

Please see below cross reference table.

For all inquiries, please contact IMCProductSupport@danfoss.com.
