DG5V8 Product Line Design Update on the Pilot Valve

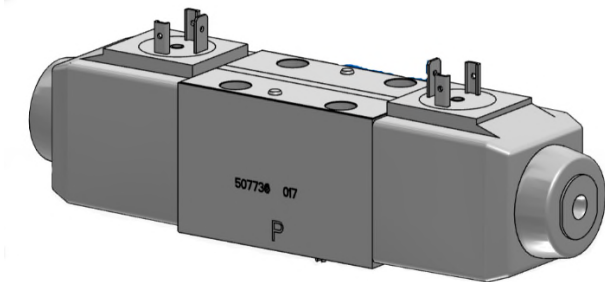

This marketing bulletin is to inform the design change update on the pilot valve of the DG5V8 product series. Due to the supply chain challenge on the pilot valve, we will be changing over to the high performance DG4V3 as an intermediary change at no charge to the customer.

Fit, form and function of the DG5V8 end product will remain the same other than the pilot valve end cap dimensions are slightly different. Picture 1 and Picture 2 below show the difference between the current pilot valve and the alternative pilot valve that we are replacing with.

Picture 1: DG4V3S to serve as a pilot valve (Current)

Picture 2: DG4V3 to serve as pilot valve (Alternative)

These changes will be effective immediately including the current open orders. We will communicate any updates with you as appropriate. See the table below for the crossover on the DG5V8.

For all inquiries, please contact IMCProductSupport@danfoss.com.

DG5V8-S to DG5V8-H Cross reference
