Discontinuation of Single-Cable Uniplug Electronic Valve Amplifiers August 2011

Danfoss will discontinue manufacturing Single-Cable UNIPLUG Electronic Valve Amplifiers. The models affected are: EHH-AMP-724-A** 1* Series ; EHH-AMP724-C** 1* Series ; EHH-AMP-724-D** 1* Series ; EHH-AMP-724-Z** 1* Series.

Production volume on these legacy products has continued to decline and ongoing sourcing and production of the component parts is no longer economically viable. We will work together with all current customers to make this product rationalization as smooth as possible; however, production of these assemblies will halt by Dec 31, 2011. Production and last time buy orders must be submitted by Oct 14, 2011. Although we will make every effort to fulfil all production and last-time-buy orders, all new orders will need to be reviewed and confirmed for lead time based on material availability and capacity. Additionally, all orders placed after Sep 1, 2011 will be priced on a quote to order basis to reflect current elevated, low volume, production costs.

Going forward, Danfoss has many options for customers who wish to control their proportional and directional industrial valves. For customers who wish to purchase control valves with IP67 environmental rating and on-board electronics, we recommend purchasing as follows:

- DG4V3*-70 design series directional control valves
- KBD/T - series proportional control valves
- KBCG3 - series proportional pressure relief valves

For customers who wish to purchase valves and field mounted amplifiers separately, we recommend purchasing as follows:

- DG4V-3 directional control valves with DIN (43650) connectors, designated by a 'U' in the valve model code and EHH-AMP-702 A/C DIN (43650) Switching Power Plugs
- KD/TG4V3 proportional control valves with DIN (43650) connectors, designated by a 'U' in the valve model code and EHH-AMP-702-D/J/K or EHH-AMP-712 D/G DIN (43650) Proportional Power Plugs
- KCG3 proportional relief valves with DIN (43650) connectors, designated by a 'U' in the valve model code and EHH-AMP-702-D/J/K or EHH-AMP-712 D/G DIN (43650) Proportional Power Plugs

Please work with your Danfoss Sales Representative to coordinate any last time buy orders and to discuss your specific transition plans.

Below is a list of all the part #'s and associated model codes affected by this announcement.

Items to be discontinued	
Item number	Model code
02-104602	EHH AMP 724 A15 10
02-104603	EHH AMP 724 A30 10
02-104604	EHH AMP 724 A50 10
02-104605	EHH AMP 724 D15 10
