◆ A type "68" spool kit is the same as the type "6" except a different diagram plate is used and the "B" model solenoid is assembled on the opposite end of the valve. A type "68" pilot valve is required for a (C) spring centered two stage valve with "4" or "8" type main stage spools.

A type "78" spool kit is the same as the type "7" except a different diagram plate is used. A type "78" pilot valve is required for a (D) pressure centered two stage valve with "4" or "8" type main stage spools.

Note

Right hand assembly shown (B models). For left hand assembly all parts, except body, are reversed. Example of left hand model: DG4S4-012B-W-*-50-LH.

△ Assemble washer with sharp break edge toward outside of valve.
