

Solenoid Operated Directional Valve

DG4V-3M-65 Design

General Description

Solenoid operated directional control valves are for directing and stopping flow at any point in a hydraulic system.

- Efficient control of greater hydraulic powers without increasing solenoid power consumption.
- Installed cost and space savings from higher power/weight-and-size ratios.
- Installation flexibility resulting from choice of numerous combinations of solenoid connectors and locations.

- Viton seals as standard for multi-fluid capability. Nitrile seals available as a model code option.
- Higher sustained Machine productivity and higher uptime because of proven fatigue life and endurance, tested over 20 million cycles.
- Solenoid coils can be changed quickly and easily without leakage from hydraulic system.
- Compact, cost effective system design when used with Danfoss® SystemStak™ valves and subplates.

DG4V-3M High Performance Valves

- Minimum pressure drop 2.5 bar at 30 l/min.
- Range of coil connectors including DIN and Deutsch.
- Range of coil voltages and power options.
- Up to 80 l/min (21 USgpm) and up to 40 l/min (10.5 USgpm) respectively at 350 bar (5000 psi).
- Offers designers the opportunity to select the optimum valve package for each application.

- International standard interface. The valve mounting face conforms to ISO 4401, size 03 and is compatible with related international standards.
- Rigorous coil tests for added protection against physical and environmental damage. Details on page R-3.
- Rated to IP69 best in the class

Tough Coils

You can rely on Danfoss ToughCoils™

OEM's strive to build dependable machines that get the job done without interruption – no matter the conditions. Our solenoid operated directional control valves matched with our new ToughCoils™ provides industry leading environmental protection and performance in a compact and rugged package.

Electro-hydraulic components are being utilized in an array of off-highway and industrial applications. Electrical winding integrity is critical. ToughCoils™ are encapsulated in a plastic surrounding by a one- piece deep drawn metal frame. With an IP69K rating(Deutsch type only), it has the highest ingress protection from dust and water. Most valve coils in the market only meet an ingress protection (IP) rating of 65.

ToughCoils™ have also passed Danfoss's own rigorous tests for added protection against physical and environmental damage:

- Extreme heat
- Thermal shock dunk
- Extended vibration test
- Salt fog
- Ice
- Bench handling
- Combined environment test
- Particle impact

Flexible Mounting – ToughCoils™ can be reversed mounted and rotated to any degree allowing more wiring flexibility in difficult locations

For other viscosities, pressure drops approximate to:

Viscosity cSt (SUS)							
14	20	43	54	65	76	85	
(17.5)	(97.8)	(200)	(251)	(302)	(352)	(399)	
% of Δp							
81	88	104	111	116	120	124	

A change to another specific gravity will yield an approximately proportional change in pressure drop.

The specific gravity of a fluid may be obtained from its producer. Fire resistant fluids usually have higher specific gravities than oil.
