

Directional Control Valves

MRV3-10

Manual Rotary Valve, 3-Way, Spool Type

210 bar [3000 psi] • 23 l/min [6 US gpm]

DESCRIPTION AND OPERATION

This is a 3-way, spool type, 2 or 3 position manually operated semi-rotary directional control valve. By rotating the manual actuator, the flow path will change from port 1 connected to port 3 (port 2 blocked) to port 1 connected to port 2 (port 3 blocked). Using the manual actuator and detent, the crossover condition can be used to create a third position with all ports blocked. This valve can be used as a diverter or as a dump valve.
