

A-HD SERIES

FLAT FACE COUPLERS ISO 16028 Interchange

The A-HD Series Flat Face Couplings

address residual pressure in a circuit or anywhere thermal expansion of trapped fluid causes pressure to develop. They connect by hand with residual pressure, without releasing any fluid into the environment, due to an internal valving system.

FEATURES

Size range: 3/8" thru 1 1/2"

Port options: NPT, SAE, JIC, ORFS

Interchanges with ISO 16028

Connect/disconnect up to 1595 psi residual pressure

- Connect under pressure, by hand
- Flat face design eliminates leakage and contamination in the circuit
- Black ID ring

APPLICATIONS

Mobile equipment and attachment tools, where sun exposure/temperature change causes pressure due to thermal expansion of trapped fluid

Any application where static pressure can get locked into the system

PRESSURE DROP

OIL = ISO VG32, TEMP = 40C, VISCOSITY = 28.8-35.2 MM²/S

Safety lock prevents accidental disconnection

High number of locking balls reduces brinelling

Special seal prevents extrusion

Black ID ring
